R517M0 coded and "Synthesis and Antibacterial Screening of Cefradine Schiff Bases and Their Metal Salts" named manuscript I reviewed it as a referee.

I think that this manuscript is an important study. In order to improve the quality of the manuscript and make it more useful to readers, it would be appropriate to make the corrections mentioned below.

1. The Author must improve the abstract section.
2. The number of sources referenced should be increased by adding more up-to-date references.
3. The manuscript should be read by an academician who is fluent in English and grammatical errors should be corrected.

I believe that after the mini corrections mentioned above are made, this manuscript will contribute and be useful to the scientific literature, scientists and the journal.

As a result, it would be more appropriate to undergo a mini revision of the article and publish it in "Qeios"

Regards.
