Squamous cell carcinoma of the corpus uteri

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Squamous cell carcinoma of the corpus uteri. ORPHA:213716*

Squamous cell carcinoma of the corpus uteri is a rare cancer of corpus uteri composed of squamous cells of varying degree of differentiation that usually affects postmenopausal women and presents with abnormal vaginal discharge, dysfunctional bleeding, abdominal pain and distension. It is often associated with cervical stenosis and pyometra.
