

# Review of: "Cybernetic-Based Instruction: An Innovative Learning Model in the Digital Age"

Saurabh Mehta

**Potential competing interests:** No potential competing interests to declare.

The authors have presented the use of the Cybernetic-Based Instruction method in modern education. The authors have given many references but need updates with the latest references. Using cybernetics is not a novel idea in many fields in which this technology is used. However, getting its impact study may be valuable for the educational technologist. Overall, it is a good read for the new researchers in this study area.
