

Review of: "Assessment of Quality, Bacterial Population and Diversity of Irrigation Water in Selected Areas of Minna, Niger State, Nigeria"

Chandrakant Jangam

Potential competing interests: No potential competing interests to declare.

The manuscript needs to be changed thoroughly before final acceptance.

1. Abstract needs to be rearranged.
2. Introduction should be elaborated with a focus on recent work done in the area.
3. Results and discussion should be more elaborative than the methodology.
4. Signs and notations should be more accurate, e.g., the Degree Celsius symbol and Oxygen throughout the manuscript.
5. Manuscripts need critical changes in sentence arrangements and uniformity in fonts and sizes.
6. Finding evaluation with recent findings in the world is missing.
7. References need to be arranged properly.
