Review of: "The Big M Game"

Ritika Maini

Potential competing interests: No potential competing interests to declare.

I found the manuscript to be a very nice one to read, giving an appropriate balance of contextualisation, rationale, theory, and results, as well as conclusions that matched the story being told throughout the manuscript. The flow of the manuscript tells the story of the work in a methodical and logical manner.

The English is of a very good standard but does need a check for the occasional "not very good English" phrasing prior to publication.

A set of appropriate and recent references has been utilised within the manuscript and is cited at relevant and important points. The references cover a range of authors, including both "big-names" and "newcomers" in the field; furthermore, the date range is suitable for the topic area covered.
