Review of: "How E-School Counseling Has Supported Learners Facing Pandemic Challenges: Results and Perspectives for Counseling Professionals"

Dr.Shaur Sarfaraz

Potential competing interests: No potential competing interests to declare.

It's an important topic and needs to be considered at this crucial time when we have AI in the field to deal with. The authors have done a good job in highlighting the important points that need to be considered when dealing with challenges at the time of the COVID-19 pandemic; however, the time has passed, and we need to focus on whether the learned lessons can be helpful post-COVID. Try to mention those points as well in the discussion.

Strengths:

- The study is well structured and contextually relevant to education.

- Providing a theoretical framework reflects that you have connected practice with theory .

- Research questions are clear.

- Described recommendations and future research perspectives well.

Needs Improvement:

- Methodology and data analysis details are lacking.- Hypotheses testing does not sufficiently analyze the degree of support in your results.

- Comparative analysis lacks successes.

So, please

- Mention the rationale and significance of the study at this point in time, with elaboration of methodology (data collection tools, their validity and reliability). Enhance the results section by providing how you have done qualitative analysis - is it deductive or inductive, etc. Expand the comparative analysis to allow a balanced examination of constraints and successes and provide an appropriate level of evidence for each hypothesis, and mention it clearly.
