## Review Report

**Title:** Continuum Models and Singularities for Heat Distributions from Light

Comments: Good work

1. Authors can include the recent work related to the above title.
2. Present work applications can be mentioned in the conclusion.
3. The authors need to validate the present work with previously published work.
4. Authors should cite at least one concrete potential application where the present results are likely to be relevant, howsoever remotely, over this range of conditions, including the boundary conditions adopted.
5. On what basis are the parametric values chosen? Do they correspond to a specific physical condition? Please justify in the text.

The problem is worth investigating; however, minor revision needs to be required. It may be **accepted** for publication subject to the above modifications/corrections.
