Potential competing interests: No potential competing interests to declare.

Enjoy reading the article "Economics Rationality in the World of Amartya Sen" with a sharp and deep way of thinking. A theme to lift Amartya Sen is a good choice. But as part of the article, there are completeness that must be met: for example: (1) in the background it is necessary to raise problems in the field (empirical data) and then offer them to be solved by Seen's thinking. (2) come up with the research focus to be addressed, for example in the form of questions. (3) The methodology will be more in-depth if given the steps to collect and analyze data to solve the problem (empirical data). (3) The need to develop triangulation data as a comparison material in providing solutions to the problems being faced. (4) conclusions, answering the focus of existing research.
