# Elisidepsin

National Cancer Institute

## Source

National Cancer Institute. *Elisidepsin*. NCI Thesaurus. Code C66949.

A synthetic cyclic depsipeptide of the kahalalides family with potential antineoplastic activity. PM02734 is a derivative of a natural marine compound extracted from the sacoglossan sea slug, *Elysia rufescens*. Although the exact mechanism of action has yet to be elucidated, elisidepsin exhibits anti-proliferative activity in a wide variety of cancer types, such as breast, colon, pancreas, lung, and prostate.
