Review of: "Investigation and Synthesis of Benzothiazole-Derived Schiff Base Ligand Against Mycobacterium tuberculosis"

Karickal Raman Haridas¹

1. Kannur University, India

1. The research articles have extensive grammatical errors that must be corrected.
2. The first line of the introduction section should be written correctly.
3. The resolution of the protein is not mentioned.
4. Docking scores of the compounds should be separately tabulated.
5. The Results and Discussion section needs more interpretation of the results.
6. The ADME properties should be discussed in detail. Try to compare your results with the current works that have already been reported and showcase the importance of your results.

The manuscript can be accepted after a major revision.
