Comments to the Author

The manuscript, titled "Phyto-Therapeutic Potential and Pharmaceutical Impact of Shilajit (Asphaltum punjabianam): Current Research and Future Prospects"

In this review, there is a comprehensive presentation of information encompassing the phytochemical significance, pharmacology, pharmaceutical impact, and the potential applications in nanotechnology, along with the nutraceutical values of shilajit. The authors describe the phyto-therapeutic and pharmaceutical applications of shilajit. I would support its publication provided the issues listed below, as well as those within the manuscript, are addressed.

1. The English language needs to be improved throughout the entire review. Some sentences are not flowing and need to be improved, especially the introduction part.
2. The name "shilajit" has been represented with various names that can confuse the reader, e.g., in some parts of the review, it has been represented by Asphaltum punjabium, while in others, it has been represented by shilajit.
3. The overall representation of the review must be justified, showing the same font and font size throughout.
4. Page #1 & page # 9: There must be one single space after a full stop.Siddha traditions.Shilajit, es [81] .In research.

Thank you!
