

Review of: "Identification of Epidural Space: A Comparison Study Between Contrast Spread and Loss of Resistance Techniques"

Satrio Adi Wicaksono

Potential competing interests: The author(s) declared that no potential competing interests exist.

This is interesting article.

however

- It was not clearly written in the method section about the study designs used in this study. please make it clear the method used in this study, whether it was clinical trial or observational study (ie cross sectional).
- The different between both approach has been explained in the discussion section. If possible, give some explanation due to both approaches, such as their utility, history, or feasibility, etc.
-
