

# Review of: "Assessment of Microbiological Quality, Phytochemicals, Trace Elements and Proximate Analysis of Bio-Clean II Herbal Remedy"

Maythem AL-Amery<sup>1</sup>

<sup>1</sup> University of Baghdad

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The paper has a good covering of the proposed subject, but some modifications are required.

## Title

Removing "Trace elements" falls under the proximate analysis.

-

## Abstract

The abstract should be summarized and eliminate the methodology statements, focus on the results and include introductory statements regarding "how the secondary metabolic product could enhance the quality of Bio clean II, even though your study is a descriptive study".

## Introduction

Elaborate on the references you cited, give more details on the scope of your results. How the results you have got from the proximate analysis can be useful.

## Methodology

No information about the plant used in the study.

Add statistics for the quantitative data.

## Discussion

Discussion section can be focused more on the results you obtained from the study, and you can expand from there.
