Review of: "A Security Framework for the Mobile Application Using Color Barcode"

Mohd Nadeem[1]

1 Babu Banarasi Das University

1. Can you provide specific examples or scenarios where the confidentiality of the system might be compromised?

2. Justify "Installing the QR code software application is necessary; otherwise, passwords need to be remembered."

3. Explain the process of "Both public and private keys are generated by a **thermal noise random number generator**."

4. Justify: There should be a guarantee that there will be fewer errors made in the flow of data transmission.

5. Elaborate on security analysis in details

6.
