Potential competing interests: No potential competing interests to declare.

This work discusses the valorization of palm oil waste fractions into oyster mushrooms and biogas production. The study aimed to reduce the environmental impact of palm oil waste.

The manuscript is very interesting, however, the authors should choose to revise the paper according the proposed changes, before it is finally published.

- Highlight the necessity of investigating this issue from an industrial perspective.
- Provide further details on potential future advancements in the conclusion section.
- Is it feasible to implement this method on a large scale for treatment purposes?
