

Review of: "Medical students' disease status of COVID-19: A multicenter study"

Evangelia Syrakouli

Potential competing interests: No potential competing interests to declare.

Introduction

I think that the paragraph "Young adults" must be the last paragraph of the introduction.

Materials

Only the colleges of the region Khyber can be a representative sample of medical students?

Results

As far as the rates of PCR and RAT concern, if someone had both the tests, in which category was he/she classified?

Conclusion

I cannot read a clear conclusion to the investigational question.

Your article is meritorious and when published will be valuable for the scientific community.
