Tako-Tsubo cardiomyopathy

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Tako-Tsubo cardiomyopathy. ORPHA:66529

Takotsubo cardiomyopathy (TC) is a recently described acute cardiac syndrome that mimics acute myocardial infarction and is characterized by ischemic chest symptoms, an elevated ST segment on electrocardiogram, and elevated levels of cardiac disease markers.
