Potential competing interests: No potential competing interests to declare.

This is a very comprehensive bibliometric analysis that addresses a lot of information about a disease as important as leishmaniasis. It provides interesting data to consider in future studies, especially to know where it is most necessary to collect information about this zoonosis.

Only a few comments:

Abstract

-Background: Genus *Leishmania* in italics.

Background:

-*Ascaris* in italics.

-Order Kinetoplastida not in italics. Italics is only used for genera and species (review the entire document, please).

-Add genera before *Phlebotomus* and *Lutzomyia*.

Methods:

-Rewrite the first paragraph to avoid repetition of "Scopus database."
