Defined Repeat Activity Until Rule

National Cancer Institute

Source

National Cancer Institute. *Defined Repeat Activity Until Rule*. NCI Thesaurus. Code C93474.

A relationship between a defined repeating activity and one of the following that may trigger the repeating activity to stop, where all items are part of a global library: Another defined activity where the repeating activity stops if this other activity occurs; A defined observation result where the repeating activity stops if this observation result occurs; A defined criteria group where the repeating activity stops if this group logically evaluates to true based on its components.
