Piperine Extract (Standardized)

National Cancer Institute

Source

National Cancer Institute. *Piperine Extract (Standardized)*. NCI Thesaurus. Code C48417.

A standardized extract containing the active alkaloid piperine, derived from the fruit of the plant *Piper nigrum* (black pepper) and/or the plant *Piper longum* L. (long pepper), with thermogenic properties. Co-ingestion of piperidine enhances the bioavailability of various nutrients, including beta-carotene, curcumin, selenium, pyridoxine and coenzyme Q10. In addition, this agent may exert anti-inflammatory and anti-tumor activities and may enhance the production of serotonin.
