Comments

Third line in introduction, Giardia in "large intestine " ???!

12th line: 'infective'

Third line in last paragraph of introduction: "disposal "

Methods

"Study area and period" à "Study location"

First line in methods: "which was founded " à "found"

Second line: "which is located in the southern part of the Oromia region, ~~was found~~ 467 kilometers from Addis Ababa"

Third line in: Laboratory stool examination

"To stop the organism from moving and keep the preparation from drying out, a cover slip was utilized" ??

Cover slips do not stop organisms from moving!

Ethical Approval and Consent to Participate

Rephrase: "The Bule Hora University Institutional Review Committee (BHUIRC/2023) ~~was~~ ethically approved ~~before the~~ study ~~could begin~~."

Second paragraph in the discussion, sixth line: "prevalence was lower than that of a The true distinction may lie in the enhancement of the ", I think there is something missing ?????!!

Third paragraph in the discussion, third line: "which showed that living in the Sidama zone?? " , where is the continuation??

Fourth paragraph in the discussion, first line: "Hand washing before a meal ~~was~~ inversely associated with a G. lamblia

infection.

Conclusion, first line needs rephrasing: "The results of the current study concluded that less than one-fourth of the patients seeking stool examination had *G. lamblia* seen by laboratory examination."
