Potential competing interests: No potential competing interests to declare.

- please indicate the statistical evidence in abstract section
- please insert the aim of the study in the abstract section
- please provide brief explanation about the method used, including the statistical analysis, calculation method, and the instruments used to conduct the study in abstract section
- please provide the concise explanation in abstract in the form of data or statistical result that will supplement the explanation and discussion on abstract section
- please add the conclusion and recommendation on the abstract section
- please indicate the research question in the form of explanation before stating your research aim in introduction section
- please explain the research design, data used, and ethical clearance (if any) for this research on method section
- Please complement the result with the discussion section that provide the explanation about the results and indicate the theories and previous research that were related to this study
- please add more references for the discussion section
- please include the references section in this manuscript
