

Review of: "Cruises Italian Tourism: Scenarios and Trends After Global Pandemic — The MSC Case"

Emilia Titan¹

¹ Academia de Studii Economice din Bucuresti

Potential competing interests: No potential competing interests to declare.

The paper examines an important strategic topic for European countries, which is the tourism sector.

The objectives and hypotheses of the research are not explained exactly.

The literature review part needs to be better developed.

Some graphs seem to be wrong (see Fig. 2, where Sea appears twice, with 35% and 3.8%).

It is worth using a more elaborate methodology, beyond graphic description.
