X-linked sideroblastic anemia and spinocerebellar ataxia

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. X-linked sideroblastic anemia and spinocerebellar ataxia. ORPHA:2802

X-linked sideroblastic anemia and ataxia (XLSA-A) is a rare syndromic, inherited form of sideroblastic anemia (see this term) characterized by mild to moderate anemia (with hypochromia and microcytosis) and early-onset, non- or slowly progressive spinocerebellar ataxia.
