Potential competing interests: No potential competing interests to declare.

The subject covered in the article is interesting as it presents an artificial intelligence implementation in agriculture. However, we would like to suggest some improvements.

1. Correction of grammatical mistakes.
2. Improve the bibliography with some of the newest work published in the field.
3. Include key words to facilitate indexation.
4. Elaborate a more concise abstract highlighting the key concepts of the work done.
5. Review citations, especially the introduction.
6. Find new ways to show possible novelties of the work done. As it is presented, it looks like a standard topic.
7. Review presentation, paying attention to a proper presentation of the content.
8. A significant revision of the manuscript prior to its publication is deeply recommended.
