I commend the author for the job well done in addressing my previous editorial comments in version 2 of the preprint. I have read through the revised version, and I am satisfied that it is now perfect for the next step(s). However, there is one minor area on page 15, as shown below (and in the attached PDF), which the author overlooked during the revision process.

Case Study: Regions with Challenges in Implementing the SDGs

- First paragraph on page 15 – first and second lines (*Sub-Saharan Africa (SSA) faces significant challenges in achieving the Sustainable Development Goals (SDGs), due to a confluence of factors including poverty, inequality, conflict, and limited*), I suggest to the author to replace “Sustainable Development Goals (SDGs)” with the abbreviation SDGs.

Therefore, I request that in the final step, that minor area also be corrected. Otherwise, I have approved version 3 of the preprint, as also seen in the rating mark. Congratulations to the author for the good work.
