

# Review of: "A trial-dependent N-player game"

Jewaidu Rilwan<sup>1</sup>

<sup>1</sup> Bayero University Kano

**Potential competing interests:** No potential competing interests to declare.

**Comments:** Quite an interesting work indeed. However, I have the following suggestions

1. All numerical examples in the work are on group G1, authors should also give numerical examples on group G2.
2. Authors only considered symmetric games, there is nothing much on the asymmetric game counterpart as mentioned in the Abstract.
