Review of: "Recent Trends and Techniques in Landslide Hazard Assessment"

Belete Getahun

Potential competing interests: No potential competing interests to declare.

I have seen the paper closely. I appreciate the authors for their interest in disseminating their work. However, the paper needs major revision to be considered for publication. First, the title of the paper doesn't match the content of the paper (the content only focused on old techniques, not recent ones, i.e., artificial intelligence and machine learning techniques). Therefore, the paper needs additional effort for publication. In addition, there are many issues like grammatical errors, paper structure, spelling errors, figure quality, and the like.
