Hello, Dears; Peer Review Team, Qeios

I reviewed the manuscript "Molluscum Contagiosum: Case Report in A 10-Year Period (2008-2017)". The manuscript described the findings related to Molluscum Contagiosum in ten patients.

Some points must be considered:

1. **Title:** The study describes the characteristics of ten patients with Molluscum Contagiosum; therefore, this is a case series study, not a case report. Please correct the title page.
2. **Abstract:** The author describes the results of the study in the objective section of the study. Please modify it.
3. **Introduction:** The author has not mentioned the novelty of the study.
4. **Methods:** Did the author examine all the patients during ten years (51,342 consultations) in order to find Molluscum Contagiosum signs? Is the author sure about the number of Molluscum Contagiosum cases among 51,342 consultations? The author has to explain about it.
5. **Discussion:** The conclusion of the study was not mentioned.
6. The manuscript needs English editing, for example, "citology" in Table 1.
