Unilateral focal polymicrogyria

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [Unilateral focal polymicrogyria](#). ORPHA:268947

Unilateral focal polymicrogyria (BFPP) is the mildest sub-type of polymicrogyria (PMG; see this term), a cerebral cortical malformation characterized by excessive cortical folding and abnormal cortical layering, that affects only one small region of the brain and that may show no neurologic involvement.
