**Potential competing interests:** No potential competing interests to declare.

This article explain about a home security system based on IoT which integrated two types of sensors namely smoke and motion sensors. From the article:

1. The literature review was not properly done. Authors should discussed about the existing similar solutions and identify the gap to be improved in their study. The literature review was discussed on devices such as NodeMCU, microcontroller, etc. instead of the existing methods or works.
2. Please explain the contributions have been made in this study compared to the existing works so that a clear contributions to the body of knowledge could be identified.
3. There are mixed of languages (i.e., English and Indonesian) used in this article especially in figures. Please revised to English accordingly.
4. Please referred all figures in text by using number of the referred figure. Avoid using "like this", "following", etc.
5. Why there is two type of references (i.e., Other references and reference)? What make them difference? Please revised.
6. Please revised spelling, punctuations and grammars of the writing.
