Dear authors,

First of all, congratulations for your paper. I think the subject is very interesting. Nevertheless, there are some issues that should be improved, namely the written english. Moreover, the literature review should be completed with some recent studies on the TPB. I advice you to read the studies developed by Elisabete Correia and Sara Sousa. Also, the questions of the survey should be completed with the source information. Each question was taken from a specific bibliographic source that should be exposed in the paper. Finally, the last section of the paper, particularly the conclusion must be improved.

I hope to be a contribution to improve your paper.

Yours sincerely
