BRCD1 Gene

National Cancer Institute

Source

National Cancer Institute. *BRCD1 Gene*. NCI Thesaurus. Code C20775.

Human BRCD1 gene is located within chromosome 13 and the size of this phenotypic locus is not reported. This phenotype-only gene has not been linked to a known protein product. Mutation of this locus is associated with radioresistance of several types of cancers; including, retinoblastoma, mesenchymal tumors and ductal carcinoma.
