# Metastasizing Pleomorphic Adenoma of the Salivary Gland

National Cancer Institute

## Source

National Cancer Institute. *Metastasizing Pleomorphic Adenoma of the Salivary Gland*.  
NCI Thesaurus. Code C35759.

A very rare pleomorphic adenoma of the salivary glands that metastasizes inexplicably, despite the benign histopathologic features. The most common sites of metastasis are bone, lung, and head and neck.
