Review of: "Crossing Language Borders: A Pipeline for Indonesian Manhwa Translation"

Hendri Ahmadian¹

1. Information Technology, State Islamic University Ar-Raniry, Banda Aceh, Indonesia

My suggestion:

1. For Evaluation metrics, more detailed mathematical equations about each of the metrics, for example, Mean Precision, Mean Recall, F1 score, mAP and Mean mAP, Character Error Rate (CER), Word Error Rate (WER), BLEU and Meteor scores. The information can be written as follows:

$$precision = TP / (TP + FP)$$

2. For better improvement of the article, please include hyperparameter settings for each training. For instance: learning rate, epoch, and etc.
