

Review of: "Beyond culture shock: entering the complex world of Global South expatriates' adaptation"

Roland Azibo Balgah¹

¹ University of Bamenda

Potential competing interests: No potential competing interests to declare.

The article dwells on a topic which is relevant but definitely underresearched. The authors also demonstrate mastery of the field and the article is a very interesting read

I have a few suggestions for consideration by the authors

Abbreviations like HR, MNC...should be written in full the first time before use

Perspectives on expatriation...

Paragraph 2, line 7: It is set to soar to 87.5m. From what? Why? The corresponding statistic for 2022 should help the authors to verify this contention.

Family issues

Line 1: replace 'have partners' with 'having partners'

A detailed methodology section should be included in the article. This should clearly explain how data for each of the two objectives in the article was collected and analyzed.
