Potential competing interests: No potential competing interests to declare.

This article is very immature, however, a few of my comments may help authors to improve it, here are the comments-

1. The manuscript is just having Introduction, add some more points i.e. short methods, and results and discuss how Indian costus are effective against SARS CoV-2? There has to be content of 3-4 pages.
2. Authors are suggest to cite the following articles- Tripathi, M.K., Ahmad, S., Tyagi, R., Dahiya, V. and Yadav, M.K., 2022. Fundamentals of molecular modeling in drug design. In *Computer Aided Drug Design (CADD): From ligand-based methods to structure-based approaches* (pp. 125-155). Elsevier.
Yadav, M.K., Ahmad, S., Raza, K., Kumar, S., Eswaran, M. and Pasha Km, M., 2023. Predictive modeling and therapeutic repurposing of natural compounds against the receptor-binding domain of SARS-CoV-2. *Journal of Biomolecular Structure and Dynamics*, 41(5), pp.1527-1539.

I would be happy to see the updated manuscript before acceptance.
