Potential competing interests: No potential competing interests to declare.

1. The term "pay less attention" might be a better choice for scientific communication. I would prefer to use the term "pay less attention."
2. Introduction should also contain a clearly defined problem, proposed solution, and justification of the work done.
3. Aim of study should be concisely written in the abstract.
4. Methods employed in this study should be informative to allow the experiment to be reproduced.
5. After "Materials and Methods," results and discussions should follow. The authors not only present data but also provide the interpretation of data in the form of discussions.
6. The conclusion should be a brief statement on the main findings.
