Potential competing interests: No potential competing interests to declare.

The authors worked on the SARS-CoV-2 Virion. This analysis required changes

1. Required First letter to be capital for any abbreviation used like SARS.
2. This is a study only? They need to explain what authors want to conclude in results of this study.
3. Figure 1 is a statistic of SARS-CoV-2 variants. It is copied from web and even authors not cited it. They must avoid the goofle images
4. This work presents results but in abstract authors mentioned about the study. Is this experimental study or review study?
5. Never used a word like if, but, you, our, we....
6. The overall analysis is not reflecting the novelty of the work. What authors want to do from this study?
