# Acidic Fibroblast Growth Factor Intracellular-Binding Protein

National Cancer Institute

## Source

National Cancer Institute. *Acidic Fibroblast Growth Factor Intracellular-Binding Protein*.

NCI Thesaurus. Code C26201.

Acidic fibroblast growth factor intracellular-binding protein (364 aa, ~42 kDa) is encoded by the human FIBP gene. This protein may be involved in the regulation of the mitogenic activity of fibroblast growth factor 1.
