Dear Editor,

This is a very interesting article that covers a current topic. The techniques used are recognized in this type of investigation, and the results obtained are also important. This article is suitable for publication after making minor changes:

1. Add a conclusion in the "abstract" part.
2. Please update the bibliographic references with recent references, especially if there are studies that have been carried out in the same country or in African countries with similarities to Nigeria.
3. Please also add a short paragraph on the impact of the results obtained on society.

Thanks,

Reviewer Dhekra TOUMI
