**Potential competing interests:** No potential competing interests to declare.

The manuscript deals with an investigation of the phytochemical richness of fresh *Musa Paradisiaca* L. (Plantain) stem juice and its anticonvulsant potential on pentylenetetrazole-challenged rats. The topic is interesting and relevant, and therefore it is acceptable for publication. However, the introduction needs some work to better set up the stage for the aims of the study. It will help the author to better explain the results.
