

# Review of: "PSYCHOLOGICAL win-win-win"

Rajkumar Rajavel

Potential competing interests: No potential competing interests to declare.

The overall contribution of the manuscript is good. The authors have done the major contribution of the research in the development of psychological win-win-win. There are some flaws in the article which restrict me to accept it in the current form. So, I would like to suggest the following minor corrections to improve the quality of manuscript.

- 1) Need to highlight the negotiation tactics applied in the win-win-win strategy. Also specify how we can arrive to optimal solution in case of win-win-win.
- 2) Novelty of research work is missing. What new finding is done through this research study.
