Potential competing interests: No potential competing interests to declare.

This is an excellent article, as it deals with a highly relevant issue at the confluence of the social sciences, the arts and the humanities in a brilliant way, both from a theoretical and empirical point of view. From my point of view, the article could be even more excellent if it takes into account the problem of social and symbolic identity in the (re)construction of physical space; as well as opening up the possibility of highlighting a symbolic cartography resulting from these identity processes. Here are some important references in this regard.
