

Review of: "Beyond Traditional Teaching: The Potential of Large Language Models and Chatbots in Graduate Engineering Education"

Gernel S. Lumacad

Potential competing interests: No potential competing interests to declare.

The article is relevant to the timely and pressing issue of the use of LLM models to education. May I suggest to the authors to emphasize that:

1. The role of school and education is to prepare the students for the work in the future.
2. The future of work in the future is focused on rapid and accelerating development in AI technologies.
3. Adaptation of AI technologies today in education, leverages the students for the work in the future while the hesitancy of adapting AI technology prepares the students for the work in the past.

The emphases of these points will strengthen the articles ground of the importance of LLM in education. Additionally, support these points with relevant literatures.
