Review of: "Prevalence, Patterns, and Correlates of Depression Among Drug-Susceptible Tuberculosis Patient Enrollees in Ogbomoso, Oyo State: A Cross-Sectional Study"

Adnan A Mubaraki¹

1. Department of Medicine, Taif University, Saudi Arabia

The authors pointed out an important topic, which is sometimes neglected by the treating physician. I would encourage the authors to elaborate on how long the duration of TB was in their cohort and how many patients were known to have depression.

If there were known patients with depression, were they following up with a psychiatrist? Have they been started on medications or had CBT (cognitive behavioral therapy)?
