Potential competing interests: No potential competing interests to declare.

Title:

The title succinctly states the focus of the research. However, it is a bit lengthy and could be simplified for better readability and impact. A more concise title could be "Rush Farming of Konjac (*Amorphophallus Muelleri*) Among Novice Farmers in Ciamis Regency, West Java Province, Indonesia"

Abstract:

The methods used (triangulation method to interview 37 farmers) are briefly mentioned, but it would be helpful to provide a bit more detail about the methodology.

In general, the abstract are too lengthy, please make it more compact.

Introduction:

the novelty of the research needs to be provided and explained in the introduction.

Materials and Methods:

1. Location of the study: please explained more about the research area, the coordinates of the location, soil condition, climate condition, social and economic condition of the farmers.

3. Analysis of Data (should be Data Analysis): The description of the data analysis is comprehensive, and the mathematical calculations and equations are well presented. However, it might be helpful to include a brief explanation of the rationale behind these calculations and how they contribute to the overall research aim.

Please add research diagram

Result and Discussions:

It would be beneficial to explore the result further, perhaps by comparing these findings with other similar research and discuss the differences by area/ spatial or time/ temporal

Conclusions:

Recommendations for Future Research: If applicable, the conclusion could also include recommendations for future research.
