# Androstane-3,17-Diol Glucuronide

National Cancer Institute

## Source

National Cancer Institute. *Androstane-3,17-Diol Glucuronide*. NCI Thesaurus. Code C121965.

A glucuronosyltransferase-modified, alcohol-conjugated metabolite of the steroid androsterone and metabolite of the steroid dihydrotestosterone produced in visceral adipose tissue, with weak androgenic activity. Androstane-3,17-diol glucuronide may be used as a marker for peripheral androgen activity.
