The study is well-planned and has good results. The study is well-planned and has produced good results; however, I have several recommendations to improve the study.

- In the abstract, the term 'LPWAN' should be written in its long form in the first use.
- The purpose of the study needs to be clarified. The introduction should define the study's scope and provide a summary of the conclusions.
- References should be clear using author names or study name (i.e. Muhammed et al.'s study... instead of [3] mentioned...)"
- Figure 3.1 in MATLAB/SIMULINK does not fit properly within its box.
- I recommend that the references for figure names should be written clearly, avoiding the use of 'above' or 'below'.
- There is no 5. Section title.
- Figure 4.9 should be redrawn.
- Some of the MATLAB code, if you have, can be shared partially.
