

# Review of: "[General Review] Digital Transformation of Government Public Library Services in Bangladesh"

Pritika Reddy

Potential competing interests: No potential competing interests to declare.

The article is interesting to read. However, the following suggestions may help the author to add flavour to the article:

1. In the introduction section add the uniqueness of the article and its contribution. How will the study add value to the communities in Bangladesh?
2. When talking about digital transformation about other countries, it will be a pleasure to also read by the South Pacific Islands. You can refer to the works done by Sharma et al. and Reddy et al.
3. Maybe adding a conclusion and recommendation to the article will make it more appealing.

Overall, its interesting piece of work done by the author.
